- PCB Designing

Projects Done

Radar Detecting Using Arduino

Guided by : Dr.M.Tharmarai Selvan (Assistant professor) Dept of Ecs, Coimbatore

Radar is an object detection system that uses electromagnetic waves to identify range, altitude, direction, or speed of both moving and fixed objects such as aircraft, ships, vehicles, weather formations, and terrain.

The main components in any ultrasonic radar are the ultrasonic Sensors. Radar's information will appear in different ways.

Basic and old radar station used sound alarm or LED, modern radar uses LCD display to show.
