- Utilized the project tracking tool "**Trello**" for task management, progress tracking, and collaboration within the testing team.

PROJECT DETAILS

1. Software Testing Project Name – Sapna Online E-Commers Project (Domain: E-commerce)

Project Description

SapnaOnline.com an e-commerce or rather an e-tailing store works on the Mission to give people the most convenient, easy and secure shopping experience on the web. SapnaOnline.com is a team of experienced people from diverse backgrounds working together to fulfill 3 main objective's - benefiting customers of low prices, providing a vast catalogue selection and products and lastly a fast, reliable and a very safe payment and delivery option to the customers.

Roles and Responsibilities

- Design test cases in company template and execute on application under test.
- Used Black Box testing Techniques such as Equivalence partition, Boundary value analysis –(BVA).
- Performing Smoke, GUI, Usability, Functional, Regression, Retesting, Sanity, Security testing, cookie testing, Compatibility Testing and UAT testing.
- Defect log and track using Jira Software and follow up with Development Team.
- Cross-Browser testing on different browser versions as well as on Android devices using **BrowserStack** tool.
- Participation in Scrum ceremonies, such as retrospective sessions, sprint planning, daily stand-ups, etc.

Technology Used In Projects

- Automation Tools : Jira Software
- Database Tool : SQL Server 2012
- Operating Systems : Windows (10)

2. Previous Project Name – PHN Career App

Project Description

This App Aims for Job Assistance Program is ideal for pass-out graduates who are seeking assistance in landing their dream job. App provide a range of courses and sessions conducted by experts from top tech companies, which also offers free job placements and internships.

Roles and Responsibilities

- Performed manual functional testing: Regression, Sanity, Smoke

- Reported found defects and Verified fixed issues
- Participated in daily SCRUM meetings

Technology Used In Projects

- Automation Tools : Jira Software
- Database Tool : SQL Server 2012
- Operating Systems : Windows (10)

3. Current Project Name – DELTA App and PRADAN App

Project Description

We help the social sector with DELTA And PRADAN, a special technology platform for field organizations. DELTA And PRADAN addresses important issues in the process from planning to execution, preventing the loss of value during program implementation. It coordinates various tasks and activities seamlessly, supports field workers, guides their actions, and ensures that important goals are achieved as planned.

Roles and Responsibilities

- Testing on various modules.
- Handled modules in the project single handedly and made the application stable by maximum issues at early stages of testing.
- Participated in Documentation and different process related activities.
- High level Smoke, Functional, GUI, Re Testing & Regression testing.
- Preparing Test cases, reviewing the Test cases and executing those Test cases
- Communicating with team members
- Cross-Browser testing on different browser versions as well as on Android devices using **BrowserStack** tool.
- Utilized the project tracking tool "**Trello**" for task management, progress tracking, and collaboration within the testing team.
- Participation in QA daily meetings and Stream daily meetings, calls with customers; grooming/planning sessions, sprint reviews

Technology Used In Projects

- Automation Tools : Trello Software
- Database Tool : SQL Server 2012
- Operating Systems : Windows (10)

PERSONAL PROFILE

- Date of Birth : July 18, 1999.
- Languages Known : English, Hindi, Marathi.

Declaration:

I hereby declare that information furnished above is true to best of my knowledge.
