About Me

Fresh graduate excited to kickstart my career in a supportive professional environment. Committed to applying my academic foundation and passion to contribute effectively to a thriving organization.

Projects

BTech Final Year Project: Modern Dairy Farm System

Project Title: Modern Dairy Farm System

Summary: Developed a responsive website using the ReactJS framework to facilitate interactive communication between dairy organizations and farmers. This platform enables farmers to receive online payment receipts on a monthly basis and empowers dairy organizations to effectively manage their business data.

Diploma Final Year Project: DOC OCR using Android

Project Title: DOC OCR using Android

Summary: Designed and implemented an Android application for Optical Character Recognition (OCR) technology. This innovation facilitates the conversion of various types of documents into editable and searchable data using digital devices or smartphones.

Experience

Vertex Technosys (2019)

- **Position:** Front End Developer
- **Responsibilities:**

Worked on a live project provided by the company to design a responsive web application developed an interactive website that enhanced communication between client and server.

Exposys Data Labs (2022)

- **Position:** Web Developer
- **Project:** Indian Charity Website
- **Description:** Developed a website for an Indian Charity, a non-profit organization aimed at alleviating national poverty. The website served as a funding source for charities, facilitating their noble causes. Created the website using the Django Framework.
