☎: 7794032070

Objective:

To apply my expertise in software engineering to create high-performance applications that meet customer needs.

Summary:

- Over a 2.9 years of experience with C#.NET, .NET Core, ASP.NET Web API, ASP.NET MVC, HTML, CSS, Bootstrap, JQuery using Amazon Dynamo DB, SQL Server(Stored procedures) and Dapper ORM Technologies.
- Developed and maintained over 3 .Net web sites using C#.Net, Web API, Asp.Net MVC, AWS Dynamo Db and SQL Server database design.

Technical Skills:

Framework & languages	: C#.Net, .NET Core, ASP. Net MVC, ASP.NET Web API, LINQ, HTML, CSS, Java script, JQUERY, .Net Framework 4.5 & 4.5.2
Data Access technologies	: Ado.Net, Dapper ORM Technologies
Tools & Server	: Visual Studio, Harness CI/CD Pipelines, Team City Pipelines, TFS, JIRA, Secret server, SonarQube, Data Dog, Trans viewer, Quanta metrics, IIS, GitHub
Database	: Microsoft SQL Server, Amazon Dynamo DB
Operating system	: Windows 8 & Windows 10

Work Experience: Infosys (July 2022 –Feb 2024)

Project: United Airlines (JET)

Role & Responsibilities: Systems Engineer

- Involved and implemented log optimization and did Unit Testing at service level.
- Implemented Mail migration enhancement using C#.Net and Asp.NET WEB API migrated CSL Endpoints analysis to New Endpoints.
- Implemented and utilized Secret Server tool to run Python scripts in Aws Dynamo DB tables.
- Involved in application monitoring for Data Dog logs and worked on fix for lower environment issues.
- Implemented data exporting to excel using C#.Net, Asp.Net MVC and SQL Server technologies and developing WCF web services.
- Troubleshoot and resolved various types of production issues.
- Involved in root cause analysis for alerts, worked with internal teams and resolved within the time.
- Implemented agile methodology (Scrum) at Jira and TFS boards.
- Involved in Harness CI/CD and Team city Pipelines based on Docker.

Hence Data Innovations (March 2021 - May2022)

Project: Retailer, ITMC, Hence Survey

Role & Responsibilities: Software Engineer

- Implemented JQuery data tables using c#.Net, Asp.Net MVC, Ajax, LINQ and SQL Server (Stored Procedures), Frontend technologies for responsive design.
- Designing and building application layers using Web API calls.
- Responsible for completing assigned work on the project during execute phase.
- Involving analysis, designing, coding and implementation of the application.
- To do work independently on issue that came up during the process.

Asserts:

- Good communication with interpersonal skills.
- Open to learning new technologies to help improve the workflow.
- Ability to work independently as well as a team.

Certifications/Courses:

- ❖ Certified Vera code Security labs Training at client level.
- ❖ Completed Angular, AI First, Generative AI, prompt engineering and AZ-900 Microsoft azure courses in Infosys Lex platform.

Internship:

- Internship on Dot net at Sathya Technologies from 2018 to 2019.

Education Details:

- **PG** – Osmania University college for women, Koti at Hyderabad (2015-2018) scored 65%
- **UG** – New generation degree college for women at Khammam (2012-2015) scored 73%
- **Intermediate** – RJC Junior college at Khammam (2010-2012) scored 75.2%
- **SSC** – ZPHS at Khammam scored 79.5%

Personal Information:

Father Name : B Kameswara Rao
Date of Birth : 16-08-1995
Languages : English, Telugu, Hindi
Marial status : Single

Declaration:

I hereby declare that all the information furnished above is true and to the best of my knowledge.

Date:

Place: Hyderabad
