- JAVASCRIPT (Basic)

PROJECTS

- **Main Project: Stick For Blind People Using GSM Assistance**
 - Blind sticks are the supporting devices to help visually impaired individuals in scanning their surroundings and identifying the obstacles without the need of assistance from external agents.
- **Mini Project: Automatic Door Opener Using Arduino**
 - This project aims to make daily tasks easier by automatically opening doors when someone approaches, improving accessibility for people with disabilities, and showcasing the potential of DIY electronics and programming to solve everyday problems.
