

AGGOJU SAI

Profile

As a fresher, specialized in Java development and focusing on software testing and development within the software development life cycle.

Work experience

2023
↑
2022

Fullstack Java Development Internship

Talentio

- I've focused on Java for backend and HTML, CSS, JavaScript, React.js for frontend. I've also worked with MongoDB for data storage, ready for diverse web projects.
- Comprehensive course on frontend and backend development.
- Certified by Talentio Academy for internship completion; secured 2nd Prize in MeritCode Fusion Hackathon on June 5th, 2023.

Projects

2024

Flappy Bird game through JAVA

Developed a Flappy Bird game using Java, showcasing proficiency in Java programming and object-oriented design principles.

Implemented core game mechanics such as player movement, obstacle generation, and score tracking, demonstrating strong problem-solving and algorithmic skills.

2023

AMAZON CLONE

Created an Amazon clone website using HTML and CSS.

Replicated core features for buying and selling products online, user accounts, and payment processing. Implemented robust security measures to ensure safe transactions and user data protection.
