PROJECTS

Portal Projects

- Customer portal
- Vendor portal
- Employee Portal
- Maintenance portal
- Shopfloor portal
- EHSM portal
- Quality Portal
- For this, I used SAP as a backend, Odata, RFC, and PIPO as middleware, and Angular as frontend

Vaccination Prediction

- It helps the people to know about the vaccine usage status.
- The Project main theme is to give a accuracy prediction of Covid-19 vaccination.
- Machine learning model That can be conveniently developed for estimating the prediction accuracy for COVID -19 vaccine. The model predicts the accuracy and the Accuracy is much far better to implement the model

Movies and TV/Series applications

- This system is a web based application that allows the administrator to handle all the activities online quickly and safely. Using Interactive GUI anyone can quickly learn to use the complete system .
- The main objective of the Project on Movies and tv / series application is to manage the details of movie, gives the correct series and entertainment. It manages all the information.
