Summary

I am a qualified and professional graduate with a passion for software development and a strong blend of creative and analytical skills. I am dedicated to building a successful career in the competitive world of technology. My commitment and dedication drive me to excel as a key player in challenging and creative environments. With a focus on continuous learning and growth, I am eager to contribute my talents to innovative projects and thrive in dynamic settings.

Skills

Java Programming: Proficient in Core Java with a solid understanding of OOPS concepts, including Arrays, Structures, Data types, Loops, and Switch statements. Experienced in working with Java Objects, Constructors, Methods, and Exception Handling. Familiar with JVM and multi-threading concepts.

Database Management: Skilled in SQL programming with hands-on experience in Oracle 10.5g. Capable of writing SQL queries for DDL, DML, TCL, DQL, and DCL operations. Proficient in creating and managing tables, views, subqueries, and joins.

Web Development: Knowledgeable in creating static web pages using HTML5, ensuring seamless display on various browsers. Familiarity with web page development principles and best practices.
