Intellipaat

Pratik Harde

Summary

To effectively utilize my knowledge and inbuilt qualities to give my level best to the organization I work with. Highly motivated and technically proficient Fresher with a strong foundation in Cloud Computing , specializing in AWS Solution Architecture and Devops principles and methodologies. My objective is to achieve a challenging position in a reputable organization that will make possible to apply my organizational skill and capability to work fit with people to achieve its goal.

Experience

Intelipaat - Intern

Nagpur, IN

07/2023 - 12/2023

- Created IAM roles and policies to control user access within the AWS environment.
- Implemented cost optimization measures such as auto-scaling, reserved instances and spot instances to reduce operational costs associated with running applications on cloud.
- Created IAM policies for users and groups with proper access control levels according to organizational security requirements.
- Created CI and CD pipelines with Jenkins and Docker to automate the build process of applications.
- Installed, configured, maintained and upgraded Linux operating systems and services.

Activities And Honors

- Volunteered at Twinkle Foundation, educating underprivileged children and handling social media accounts, and also worked in pandemic.

- Participated in one week program on "Metro Rail Technologies" organized by Tulsiramji GY Patil Clg,NIC,220
- Participated in "Zero Energy Building" workshop at techfest, IIT Bombay, 2018.
- Worked as a volunteer in Twinkle Foundation at event "The Pankh Festival" Nagpur.

Qualities

- Confident and Quick learner
- Leadership skills

Certifications

- AWS Solutions Architecture Virtual Experience Program by Forage, 2023
- Fundamentals of Digital Marketing from Google Digital Garage and Great Learning, 2023
- Completed an Online training course of “Soft Skills” offered by IIT Bombay, 2021.
- Completed a basic training course on “Financial Markets” at “Shine Projects”

- Effective Communication skills
- Can work fit in any environment.

Project

- Application Deployment Using CI/CD Tools Implemented a git workflow architecture and used Jenkins Jobs to deploy a container on specific ports for different branches, including the develop branch for testing the Dockerfile, the master branch for testing the final version of the Dockerfile, and the production server for the final release of the product. The process was automated using Jenkins, Git and Docker.
- Deploying Multi-Tier website using AWS Ec2 Deploying a php website that receives data from the user and stores. The entire architecture is scalable due to the Auto scaling of services and is highly available. Data stored in RDS is highly secured, encrypted and manages failover. It can only be accessed by authorized database admin.
