Objective

I seek challenging opportunities where I can fully use my skills for the success of the organization.

Experience

TCSiON

March 2024 - May 2024

Intern

Working on the Project Automate Sentiment Analysis of Textual Comments and Feedback

Education

Tatyasaheb Kore Institute of Engineering and Technology

2024

B-Tech

7 CGPA

Skills

C

C++

Python

Microsoft Excel

Stock Market

Projects

Entity Relationships Conversions into Relational Database

Entity Relationships Conversions into Relational Database," involves building a system where users can input entities, and the system automatically generates an Entity-Relationship (ER) diagram based on those entities. Then, using the ER diagram as a guide, the system creates corresponding tables in a relational database. This process streamlines the conversion of entity relationships into a structured database format.

Achievements & Awards

Certificate of Achievement for successfully completing Human Training Resource Program
