□ Nagpur, Maharashtra

SUMMARY

Experienced Data Analyst with a keen focus on Business Services. Demonstrated proficiency in offering consistent support to the data and development department, handling daily tasks, and addressing standard issues efficiently. Capable of managing expectations effectively and adept at working with extensive datasets.

EXPERIENCE

Data Analyst Intern

04/2024 Present

Unified Mentors

Nagpur, Maharashtra

- Design and execute databases, data collection protocols, and analytics strategies to enhance statistical efficiency and data quality.
- Source data from primary and secondary channels, maintaining databases and data systems. Identify, analyze, and interpret trends and patterns within intricate datasets.
- Conduct data filtering and cleaning processes. Collaborate with management to prioritize business and informational requirements.

Data Analyst Intern

01/2024 03/2024

Trainity

Remote

- Engaged in business case studies and problem-solving throughout the training period.
- Developed Key Performance Indicators (KPIs), tables, and employed diverse metrics to effectively communicate analytics findings.
- Applied modeling techniques to address problems and evaluated model performance. Successfully completed daily tasks and modules assigned.

PROJECTS

Analyzing Amazon Sales Data

- During my internship, I initiated a project focusing on analyzing Amazon sales data. While delving into the data, I identified significant sales trends within a specific month and recognized the competitive landscape. I have prepared a report addressing these business challenges along with proposed solutions. Subsequently, we successfully increased product sales by 25% as a direct outcome of implementing these solutions.
