

Vinothini Nallathambi

9942125687 vinothini4.slm@gmail.com

summary

- Innovative individual with proven success evaluating requirements for software development projects to design innovative solutions. Out-of-the-box thinker and problem solver dedicated to improving performance. Works well in teams and consistently delivers to deadlines.
- Diligent and motivated manual tester with a keen interest in software quality assurance and testing methodologies.

EDUCATION

Bachelor Of Commerce in Computer Application (B.Com C.A)

K S Rangasamy college of Arts and Science (Autonomous)

Tiruchengode

2019 - 2022

75.01%

CERTIFICATES

- Core Java and MySQL certified in Futogen

(2022) Aug - Jan

- Full Stack Web Development certified in Crampete

(2023) Feb - July

SKILLS

- Core Java
- Full Stack Web Development

Html, Css, Javascript, Reactjs, Nodejs, MongoDB

- **MySQL**
- **MsOffice**

Word, Excel, Powerpoint

- **Typing**

WORK EXPERIENCE

Currently working in **Kanan International** since March 2023

Developer Engineer, Technical Support Engineer

PROJECT EXPERIENCE

1. **Project Title** : **Quizky - Online Test Prep**

Role : **Programmer Analyst cum Technical Support Engineer**

Client : **IMS India, Time, Byjus ans so on.**

Project Description: Quizky is a quick yet effective way to check performances delivering test in online, offline and hybrid mode. The brand new easy to use yet advanced word2quizky plugin comes with many usability improvements and fixes that will make the process of quiz authoring more flexible and streamlined.

It involves a process of creating Question paper, Tests, Templates, subjects , Areas , Topic Mapping , Publishing test. Using the admin portal of Quizky , user can easily upload questions, item mapping, directions, instructions . It contains all the modules related to test and examination.

2. **Project Title:** **Manual Testing**

Role : **Manual Tester intern**

- Adept in creating comprehensive and well-organzaied manual test cases for software applications.
- Skilled in executing test cases, recording results, and accurately documenting software dfects

for efficient issue resolution.

- Demonstrated ability to design test scenarios that cover various functional aspects and ensure the quality of the software product.

3. Project Title: **Weather Api**

Role : **Development**

Project Description: WEATHER API:-

The developed code displays the Interactive Weather Application using ReactJS Framework. The developed application will provide real-time weather information to the user for the city they have searched. If the user searches, for the wrong city, an Error message is also displayed to the user, stating that the searched city is not found. We have used OpenWeatherMap API which provides us with access to weather data from around the world. We have fetched the weather information for various locations, including wind speed and more.

Tools used in weather api:

Html, Css, Javascript, ReactJs.

4. Project Title : **Rest Api**

Role : **Development**

Project Description: A REST API (also called a “RESTful” API) is a specific type of API that follows these guidelines. REST stands for Representational State Transfer. This means that when a client requests a resource using a REST API, the server transfers back the current state of the resource in a standardized representation.

The tools used in rest Api:

The Axios library will provide you with an HTTP client. This client is used to make HTTP requests to external resources. Axios is a promise-based HTTP client that can send asynchronous requests to REST endpoints.
