PERSONAL PROJECTS

SCHOOL MANGAMENT SYSTEM (Technologies :- HTML ,CSS(Front end), PHP , MySQL(Backend))

- It is a management system that uses open source school management system for reducing daily routines of the school personnel that includes administrators, staff and teachers. Upload many documents, and activities in an educational line thus reducing any unnecessary workload and offering more time.

CAMPUS RECURITEMENT SYSTEM (Technologies :- HTML , CSS(Front end), PHP,JAVA(Backend))

- It is a python & web application project. The main domain of our project is selecting the students for the campus recruitments based on their performance on academics. It helps the management to identify the students who are eligible for the respective company.

ACHIEVEMENTS

Project Certificates in Hackathon

A Hackathon is a social coding event that brings computer programmers and other interested people to improve upon or build a new software program.
