EDUCATION

Btech Computer Science

Jyothi Engineering College

TECHNICAL SKILLS

- ui/ux designer
- React
- JavaScript
- Mongo DB
- Full stack web development
- Node.js
- AWS(Basics)
- Zetachain
- Java
- C
- Machine Learning with Python
- Oracle
- MySQL
- GIT
- Agile
- Assembly Language
- Data Structure & Algorithm

SOFT SKILLS

- Leadership
- Project management
- Time management
- Communication

HARDWARE SKILLS

- Internet Of Things

PROFILE

Possessing a B.Tech in Computer Science and Engineering with Honors in Cryptography, I specialize in developing dynamic web applications and optimizing user interfaces for enhanced user experience. Proficient in database management, cloud technologies, and machine learning, I effectively lead projects using Agile methodologies. Committed to staying updated with advancements in blockchain, IoT, and AI, I strive to deliver innovative solutions that exceed industry standards while continuously enhancing my technical skills.

PROJECTS

SOFTWARE PROJECTS

- Alumni Hub
- Fruits and Veg Recognition using ML
- Assistrend app
- Foodie Online food App
- Website For Christmas
- Weather Prediction Using ML
- Insect Identification & Pesticide Recommendation
- Galaxy web app (NASA)
- Aura cosmetics web app
- JYO Map app

HARDWARE PROJECTS

- "GROWING GREEN" using IOT
- Muppli Beetle Trap

SHELJA SHERIN MV

SOFTWARE ENGINEER

WORK EXPERIENCE

Ui/UX designer

ASSISTREND

- Led the design of intuitive web and mobile interfaces.
- Managed a team of designers across multiple projects.
- Transformed the design team with advanced UI/UX principles.
- Designed comprehensive UI/UX frameworks and strategies.
- Developed applications using modern frameworks.
- Established standardized design solutions and best practices.
- Conducted reviews of design elements and requirements.
- Assisted in developing in-house design tools.
- Managed global design solutions.
- Maintained design standards and guidelines for consistency

Mern Stack Developer Intern

Kirabiz Technologies

- Developed full-stack web applications using the MERN stack.
 - Integrated front-end and back-end components.
 - Designed and implemented RESTful APIs.
 - Assisted in scalable web application development and deployment.
 - Conducted code reviews and debugging.
 - Participated in Agile ceremonies.
 - Optimized application performance and user experience.
 - Maintained project documentation and version control.
 - Assisted in database design and management.
 - Contributed to responsive UI component development.
-
