- After the completion of daily update in Reval, at the first business day of the month,
- Download Accrued interest report from Reval. At the last business day of the month,
- Download Notional balance report
- If there is a difference found in the template, send mail to treasury group id.

Project-3

Project Title : Employment TAX

Client : Aflac

Role : Developer

Application : Document Direct

Environment : UiPath studio (2022v)

- Login TO Document Direct Web Application
- On daily basis, the reports are downloaded from SAP and Document Direct application.
- The reports are saved in shared path with report name followed by current file name.
- Two reports are downloaded from SAP and eight reports are downloaded from Document Direct.
- The report in sap is downloaded only on Tuesday and Thursday.

Project-4

Project Title : Export Report NY&AL

Client : Aflac

Role : Developer

Application : Document Direct

Environment : UiPath studio (2022v)

New York:

- Launch Document Direct.
- Access document and export the report
- Format the excel and check if the results matches
- Send the report over mail

Alabama:

- Launch Document Direct.
- Access (summary report) document and export the report for each month starting from Jan. Consolidate each month reports to the existing base report of Jan.

- Access and extract the three reports available for the same report ID for each month starting from Jan. Consolidate each month reports to the existing base reports of Jan. The available three reports are: Less than 5K,Between 5K-25 K,Greater than 25 K
- Format the excel to match the results
- Compare the result in (summary report).

Project-5

Project Title : Financial control
Client : Aflac
Role : Developer
Application : Document Direct
Environment : UiPath studio (2022v)

- Check the SAP generated report exists in the shared path.
- Find the SAP file created on the same day for execution happening from Tuesday to Friday. For Monday execution locate the file on last Saturday date
- Manually read and extract the Company code, Document type, CR amount, DR amount for the line items from the shared path SAP report file.
- Get the respective company code, keyword and Doc. Direct report code for the line item in the master file matches with company code
- Launch the Document direct application and locate the SAP interface report using Doc. Direct report code.
- Open the current date file in the collections and compare the line items to match the amount.
- Then locate another file called legacy system report in the same document direct application.
- If mapping master file has different locations Doc. Direct code it will process each and every code.

Responsibilities:

- Worked with **SME's** to create **Process Design Document, (PDD)**, and developed a separate **Solution Design Documents, (SDD)**.
- Implemented End to End Robotic Process Automation (RPA) using **UiPath**
- Develop and test automation processes including unit and integration testing.
- Implemented **selectors** for interacting with **window** and **web browsers** for continuous navigation of applications.
- **Configuring new processes** and **Activities** using **Core Workflow Principles** that are efficient, well-structured and manageable.

- Used **SAP Application** method for **extracting structured data** from **SAP applications** and saved in **Excel Spread sheet**.
- Used **Excel automation** for repetitive **Excel data entry, appending andfor comparing the records in SAP**.
- Downloading **COA(certification of Analysis)** From Share Point.
- Downloading from **Web Application**
- Handled exceptions using **Try-Catch activity**.
- Handled the Execution of project in **UiPath Robot**.
- Deployed the process in **UiPath Orchestrator** and scheduled their execution.
- Used **Queues** to collect information from **orchestrator** to perform additional tasks.
- Participated with test teams during the Product test and **UAT phases** to fix assigned bugs.
