January 2024 to Present

Completed comprehensive form Python course, mastering fundamental concepts.

NGO, Non-Profit / Student Organizations

National Service Scheme

April 2022 to Present

The National Service Scheme (NSS) is an Indian government-sponsored program aimed at fostering social consciousness and volunteerism among students. It involves various activities like community development, healthcare, education, and environmental preservation, engaging young people in

service to their communities. The NSS encourages active participation in nation-building while instilling a sense of responsibility and empathy in the youth.

As a college volunteer in the National Service Scheme (NSS), I underwent a comprehensive one-week training program geared towards community engagement and service. Following this training, I dedicated my time and effort to volunteering in two villages in Meerut, focusing specifically on water-related initiatives. My work involved raising awareness about water conservation, implementing strategies for better water management, and actively participating in activities to improve access to clean water within these communities. It was a fulfilling experience contributing to the betterment of these villages while being a part of the larger mission of the NSS.
