PROFESSIONAL EXPERIENCE

Software Developer - Trainee

Decision Minds | Dec 2022 - Oct 2023

- Implemented Redux for state management, ensuring efficient data flow.
- Utilized React Hooks for functional component state management and improved code maintainability.
- Collaborated with back-end teams for seamless RESTful API integration.
- Troubleshooted issues effectively to optimize application performance.
- Stayed updated on emerging front-end technologies, including the latest React Hook patterns, and shared knowledge within the team.
- Contributed to the development of reusable UI components for code efficiency.
- Utilized Git for version control, facilitating code collaboration and tracking changes effectively

PROJECT DETAILS

- **Data Hub**-Developed a product designed for migrating legacy databases into Snowflake. Utilized React.js to build a user-friendly and efficient interface for the product.
- **Employee Data Management Application**-Developed a web app with React.js, Node.js, and MySQL for employee data management, including input, editing, and CSV export.
- **E-commerce** -Developed a responsive e-commerce website using React.js, offering an interactive shopping experience with fast loading times and cross-browser compatibility.
- **Food Delivery App**-Implemented an Online Food App Delivery System using Java, Spring Boot, and OOPs principles. Developed a user-friendly interface for customers to place orders seamlessly through the web or mobile app.
