Cloud Platforms: AWS, Digital Oceans, Google Clouds

Tools: VS Code, IntelliJ Idea, Spring Suite Tool, Postman, Git Version Control, Github

Soft Skills: Teamwork, Remote Collaboration, Communication, Adaptability, Observation

Data Structures & Algorithms

Experience

- **Founder & Full Stack Developer** softwerve.com **January 2024 - Present**
As the founder and full-stack developer at Softwerve, I spearheaded the development of [CodeDelite](#), a revolutionary web development platform designed to empower developers of all levels. CodeDelite offers a vast library of premium web templates and components, fostering a thriving community of developers who can showcase their creations, collaborate on projects, and monetize their expertise. My role involves overseeing the platform's development, implementing innovative features, and ensuring a seamless user experience for our growing community of users.
 - Developed CodeDelite from concept to execution, leveraging my expertise in full-stack development to create a dynamic and user-friendly platform.
 - Led a team of developers to build and deploy various features, including template marketplace, community forums, and monetization options.
 - Implemented robust security measures and performance optimization techniques to ensure the platform's reliability and scalability.
 - Continuously iterate on the platform based on user feedback and market trends to enhance functionality and user engagement
- **Software Developer Intern** [Masai Labs](#) **January 2024 - Present**
During my tenure as a Software Developer Intern at Masai Labs, I had the opportunity to work on two industry products built from scratch.
 - **Masai Learn:** Collaborated with a team of developers to create Masai Learn, a tutorials and notes providing platform used by Masai School. Played a key role in designing and implementing frontend and backend functionalities, ensuring a seamless user experience and reliable performance.
 - **AIMEE School Management Platform:** Contributed to the development of AIMEE, a comprehensive school management platform with role-based user dashboards. Worked on frontend and backend development tasks, including user authentication, data management, and dashboard customization. AIMEE is currently in use at AIMEE School, Vijayawada, Andhra Pradesh.
