Summary

Detail oriented test engineer with 2.5 years of hands on experience in manual testing. Proficient in functional, compatibility, performance and regression testing Skilled in testing, debugging. Proficient in identifying, documenting and tracking defects to ensure high quality gaming performance across various platforms and familiar with different database such as JIRA, Mantis, Clickup and many more. Skilled in test cases creation and execution. Demonstrated expertise in maintaining test environment and executing rigorous testing procedures to enhance game performance and experience user experience. Familiar with various game engines, platforms and tools. Strong problem solving skills with attention to details.

Work experience

Test Engineer

12-2021 - present

Globalstep, Pune, India

- Developed comprehensive test cases and test plans, ensuring thorough coverage of software functionality and adherence to project requirements.
- Executed test cases and meticulously documented software defects, collaborating with developers to resolve issues and enhance product quality.
- Maintained and updated regression sheets, ensuring accurate and up-to-date test coverage for future releases.
- Conducted various types of testing, including smoke testing, ad hoc testing, stress testing, regression testing, functionality testing, and compatibility testing, to ensure the robustness and reliability of software applications.
- Effectively managed a team of 4-5 resources, coordinating their tasks and ensuring timely project delivery.
- Utilized test management tools such as JIRA, Mantis, and Hansoft to track and manage testing activities, ensuring an efficient workflow and effective communication.
- Collaborated seamlessly with cross-functional teams to ensure the quality and performance of products, actively participating in meetings and providing valuable insights and feedback.
- Maintained clear and organized test cases and test results in JIRA, facilitating easy access and reference for team members.
