Technical Skills

- Programming languages: Java,Php, Python.
- Web technologies: HTML, CSS
- Database: Oracle, MYSQL
- Operating Systems: Windows 10, Linux

Skills

- Ability to adapt to technological changes.
- Confident and determined.
- Quick Learner.
- Good communication skills.

Internship

Markup Infosystem, PHP Intern:

- Completed a 6-month internship at Markup Infosystem.
- Gained experience in both front-end and back-end development.
- Contributed to projects in PHP development.
- Assisted in the development of e-commerce platforms using PHP and MySQL.
- Collaborated with the team to troubleshoot and debug code issues.

Projects and Tasks:

1. Arihant's Report and Ticket Dashboard

- Developed a report and ticket dashboard system for Arihant, facilitating efficient management of reports and tickets.
- Implemented features for tracking ticket status, generating reports, and managing user access.

2. SGBS Login, Logout and Profile Page

- Designed and implemented the login, logout, and profile page functionalities for SGBS.
- Ensured user authentication and authorization mechanisms were robust and secure.

3. Alive Restaurant Project

- Contributed to the development of the Alive Restaurant project, an online platform for restaurant management.
- Implemented features such as order management, menu customization, and customer feedback integration.
- Ensured the system was user-friendly and responsive for both customers and restaurant staff.

Academic Projects

- Event Management System in Java: Software developed to keep records for managing events (e.g., details of events like Music, Decoration, Menu List, Guest List, etc.)
- Grocery Store Management in Python: Software developed to manage the activities done in grocery store (e.g. to maintain the records of the products, sales, stock, and customers).
- Online Tattoo System in React js: For tattoo studio owners, successfully managing and operating the business comes with many daily hassles. Serving customers as well as managing team of artists, scheduling appointments, maintaining a track of deposits from clients. That is where a tattoo studio software can come in handy.
