EDUCATION

Savitribai Phule Pune University

B.E in Computer Engineering
Pune , India
B.E Grade : A

MOLADINA JUNIOR COLLEGE

Maharashtra State Board
Pune, India

VISHWAKARMA VIDYALAYA SCHOOL

Maharashtra State Board
Pune, India

COURSEWORK

Blockchain
Data Science
Advanced Machine Learning
Data Analyst
Cloud Computing
OOPS
Data Structure
Google-Coursera

SKILLS

PROGRAMMING

Python
Haskell
C++
Java
SQL
TypeScript
Docker
Kubernetes

OS - Linux, Windows

CERTIFICATIONS

- PGP Course in Data Science
- PGP Course in Python
- January 2022 Data Science and Machine Learning
- January 2022 Virtual Experience Program participant
- November 2021 Data Exploration
- August 2021 Machine learning

PROJECTS

AMAZON FINE FOOD REVIEW

- Build a project based on **NLP** tools to derive a pelucid understanding of the customer review and to extract the insights from the model.
- The **KNN** algorithm is utilized to predict primarily associated outcomes based on ratings

SMS SPAM/HAM

- This project employs **Machine Learning** and NLP techniques to classify SMS messages as either spam or ham.
- The patterns are identified using the Regex library.

NFT Minter Module

- Architected a comprehensive module for NFT minting, transmission, and acquisition.
- Integrated MeshJS for efficient blockchain interactions and transaction optimization.
- Employed React for a dynamic and user-centric front-end interface.

AWARDS

- Won **NATIONAL** medal in karate
- Best player of the year.
- Secured 3 medals on Kaggle

EXPERIENCE

Konma – Blockchain Developer

Feb 2023 – Feb 2024

- Developed smart contracts using Haskell, improving security and functionality of blockchain applications.
- Gained hands-on experience with Marlowe, creating financial contracts on Cardano blockchain

Mynth – Developer

Jan 2024 – July 2024

- Developed on-chain services on the Cardano blockchain, collaborating closely with Infrastructure and Smart Contract Development teams.
- Created and managed containers, overseeing code management, and utilizing diverse infrastructure tools to streamline operations.

ArgonGame - QA - Remote

- Utilized various testing tools and methodologies to identify, document, and track bugs across multiple game titles
- Communicated effectively with the development team to provide detailed feedback and assist in the resolution of identified issues.
