PERSONAL PROJECTS

Major Project- HEALTHCARE APP

Web-based application which is specially developed to reduce the cost of the user and increase the efficiency of the hospital system. Healthcare app includes registration of patients, their appointments, storing their details into the system, and helps to access all the information.

Mini Project - ONLINE BLOOD APP

Helps to select the right donor online instantly using medical details along with the blood group. The main aim of developing this application is to reduce the time to a great extent that is spent in searching for the right donor and the availability of blood required.
