

CAREER OBJECTIVE:

Seeking a technically challenging position in the area of Software Testing, providing a highly motivated, progressive, friendly environment, encouraging the pursuit of career advancement and expand my knowledge and skills and to integrate my personal expertise to the company's goal.

PROFESSIONAL SUMMARY:

- Good knowledge in Software testing which includes **Manual/Functional testing, Database testing, API testing, Web application and Mobile application testing.**
- Good knowledge in Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC).
- Good in the preparation of test plans, developing test scenarios and test cases based on business requirements and technical specifications.
- Good in Understanding the business requirement documents like SRS, FRS, BRD and Process flow documents etc.
- Task completion within the period with time management as well as client satisfaction.
- Defect/Bug identification and classifying them as per the severity, preparation of weekly and monthly status reports
- Knowledge in framework like **TestNG Framework** with selenium.
- Involved in Automation testing which includes writing scripts for the functionality and perform regression testing through **Selenium Web Driver.**
- Good knowledge in writing **SQL queries** and **Database testing.**
- Good knowledge in reporting defects using **Jira.**
- Strong Experience in Automating Web Application Testing using Selenium WebDriver with **TestNG** framework.
- Good team player, adaptable, quick learner and good in motivating the team towards the deliverables on time.
- Good knowledge in reporting defects using **Jira.**

EDUCATIONAL QUALIFICATION:

B.Tech, from Sai Spurthi Institute of Technology affiliated by Jawaharlal Nehru Technological University, Hyderabad.

TECHNICAL SKILLS:

- | | | |
|------------------------|---|---|
| ▪ Languages Known | : | Java |
| ▪ Testing Tools | : | Selenium Web Driver, |
| ▪ Automation Framework | : | TestNG |
| ▪ Configuration Tools | : | Jenkins |
| ▪ Operating System | : | Windows |
| ▪ Database | : | Postgres |
| ▪ Web Technologies | : | PHP, Java, Android (Mobile Development) |
| ▪ Other Tools | : | Eclipse, JIRA, Excel, LibreOffice. |

PROJECT DETAILS:

PROJECT # 1

Project: Adactin

Description:

- Using this system user can view and check for various rooms available and simultaneously book them by making online payment via credit card.
- The system calculates the total cost on booking the services. Once the user makes the payment, system will provide online receipt to the user.
- User can view the room booking in an effective graphical user interface.

ROLES & RESPONSIBILITIES:

- Understanding the Requirements and preparing Test scenarios and Test cases
- Executing Test cases, finding defects and logging defects in defect tracking tool.
- Communicated with QA team members and developers to resolve testing issues.
- Coordinating with development team to track the defects to closure.
- Designing the framework with Selenium WebDriver and TestNG.
- Testing API services, ensuring proper validation of data transfers.
- Proficient in debugging unresolved issues from support tickets, collaborating with team members to identify root causes, and implementing permanent solutions to ensure system stability.
- Participated in Client meetings and discussions to facilitate UAT (User Acceptance Testing) Demonstrations and deliver training programs.
