PROJECTS

Water jar client

- Spearheaded the implementation of a new UI/UX design framework, resulting in a 30% decrease in bounce rate and a 20% increase in average session duration on the web app.
- Improved server-side logic and optimized databases, leading to a 40% decrease in response time and an impressive 60% reduction in query execution time.
- Translated UX designs into responsive interfaces using HTML, Bootstrap, and React .

URL Shortner

- Developed a high-performance URL shortening application using React, MongoDB, Express, Node.js, and Tailwind CSS, resulting in a 40% reduction in link generation time.
- Utilized Node.js and Express to optimize server-side operations, achieving a 25% decrease in response time for link redirection.
- Built an admin panel for monitoring and managing short URLs, enhancing overall system control.
- Implemented a user-friendly interface with React and Tailwind CSS, leading to a 30% increase in user adoption.

DIGI-LOCK | HTML, CSS

- Developed an interactive digital clock web application using HTML, CSS, and JavaScript. The application displays the current time with hours, minutes, and seconds, and updates in real-time. Users can interact with the clock by clicking on the time units to trigger custom functions. The project demonstrates proficiency in front-end development, including responsive design and dynamic content updates, and enhances user experience through interactive elements.
