## Software Test Engineer | Automation Tester

✉ Mankit1500@gmail.com 📞 7224801549 📍 Shahgarh, Dist. Sagar, MP 🌐 [linkedin.com/in/ankitmishra44](https://www.linkedin.com/in/ankitmishra44)

🇮🇳 Indian

### Profile

Highly motivated and detail-oriented QA professional with 2.7+ years of experience in automation and manual testing using Java. Proven track record of delivering high-quality software products by identifying and resolving defects, with a 99% defect-free rate in my last project. Skilled in creating automated test scripts, test data management, and test environment setup, with expertise in Java-based frameworks. Strong analytical, problem-solving, and communication skills, with a solid understanding of software development life cycles.

### Skills

#### Programming Language

Java

#### Soft Skills

Team work and Collaboration,  
Adaptability, Continuous Learning

#### Tools

Jira, Git, Bitbucket, Selenium,  
Cucumber

#### Framework

TestNG

#### Quality Assurance

Test Planning, Designing,  
Implementation & Defect Tracking  
and Reporting

### Professional Experience

#### Software Test Engineer

Dec 2021 – Feb 2024 | Pune, India

##### Mphasis

- Designed comprehensive test cases that ensured thorough coverage of both positive and negative scenarios, enabling the identification of potential issues and edge cases.
- Implemented testing solutions for web applications using Selenium with Cucumber framework, reducing manual testing hours by 70% and enhancing test coverage.
- Conducted comprehensive API testing using Postman, uncovering and resolving 50+ critical bugs, and enhancing API performance.
- Leveraged strong Java skills for test automation and seamlessly integrated Selenium, developing robust test suites that reduced testing time and improved defect detection rate.
- Logged defects in a prompt and efficient manner, facilitating seamless communication with development teams to drive issue resolution and improve overall product quality.
- Facilitated defect re-testing cycles, achieving faster resolution rate and increasing release stability through rigorous ad-hoc, acceptance, and performance testing methodologies.
- Created regression tests with the Selenium framework to identify minor and major issues, ensuring high quality application performance.
- Managed project deliverables by leveraging Jira's scrum framework to oversee issues, sprints, and backlogs, ensuring timely project completion.
- Implemented cross-browser testing to validate the functionality and appearance of the application across different web browsers.

### Education

#### Bachelor of Technology (CS)

Aug 2017 – Jun 2021 | Indore, India

Sushila Devi Bansal College of Technology

### Interests

#### Cricket

Enjoy playing and watching cricket, with a strong interest in the sport's strategic and tactical aspects.

#### Travelling

Explore new places and cultures, with a focus on learning about different customs and ways of life.

#### Stock Market

Follow market trends and news, with a focus on understanding the underlying fundamentals and technical analysis.
