PROFILE

Computer Science graduate seeking an entry-level position to apply technical skills and problem-solving abilities. Eager to contribute to real-world projects and continuously learn new technologies.

PROJECTS

Artificial Intelligence based Recommender System for Fitness

2024

AI-driven fitness systems offer personalized recommendations for workouts, diet, and lifestyle, catering to individual goals and preferences. By adapting and learning from user interactions, they enhance motivation and deliver improved fitness results.

Trip Together

2023

This project primarily focuses on the solo travelers who want to travel to the same destination. Here, the user can create the trip and also can suggest places he can view the profiles of the travelers with them. The user can search nearest places and restaurants and the user can also take initiative for the trip.
