📁 PROJECTS

A study on export and import procedure towards Sailink logistics pvt ltd

2022 – 2023

A comprehensive study on type on logistics such as inbound ,outbound, reverse, third party and distribution logistics that provides a clear view of the complete process in Sailink logistics. This research could also be useful to improve the company's approach towards international trades and shipping logistics which further provides insights about global trade and international market.

Asia cup in Power BI Project

Asia cup dashboard provide a comprehensive view of organization's team, highest run, and wicket taken to make informed decisions that can improve player of the match, best run rate, and over all result performance. these insights can also help in aligning format strategies with the cricket broader score and objective.

02/2023 – 09/2023

Olympic project in used by power BI tools

2023 – 2024

The Olympic Project leverages Power BI tools to analyze and visualize data related to the Games. Through Power BI, organizers and stakeholders can track athlete performance, monitor event logistics, and analyze audience engagement in real-time. Interactive dashboards provide insights into medal counts, country participation, and event schedules. This integration of data analytics enhances the overall efficiency and strategic planning of the Olympic Games.
