EXPERIENCE

Hands On Experience

ACSD, CDAC, Pune *Sep 2023 - Feb 2024*

Centre for Development of Advanced Computing, Pune

Achievements/Tasks-

Build a E-Commerce website which is E-Plumbing-Store on multi-tier architecture which is loosely coupled highly cohesive consist of 3 layers.

For the presentation layer, I use React, a popular front-end framework that provides a fast and efficient way to build user interfaces.

For the business layer, I use Spring Boot, a popular Java-based framework that provides a quick and easy way to build enterprise-level applications.

For the data access layer, I use MySQL, a popular open-source relational database management system.

PROJECTS

E-Plumbing-Store

Backend Development *Nov 2023 - Feb 2024*

The Online Buying of Plumbing Materials and Spare Parts application is developed for the Resellers to buy products in large quantities. An e-plumbing store is an online Wholesale store that specializes in selling plumbing products and supplies. These products can include things like pipes, fittings, valves, faucets, toilets, sinks, and other related items. Resellers can browse and purchase these products online, and have them shipped directly to their job site.

Employee Management System

Backend Development *May 2021 - Aug 2021*

Designed and implemented the backend functionality for an Employee Management System (EMS) CRUD (Create, Read, Update, Delete) operationsto manage employee records efficiently.Used J2EE for backend, MySQL for database.
