RELEVANT PROJECTS:

Food Delivery App

- Food Delivery App: Developed a food ordering website/app using React JS. Comprehensive Pages: Created Home, Cart, and Order pages to display menu items and manage orders using React JS. User Authentication: Implemented Sign In/Sign Up popups with HTML, CSS, and JavaScript. Dynamic UI: Ensured dynamic and responsive UI/UX with HTML, CSS, and React JS.

Weather App

- Real-time Weather Data: Used OpenWeatherMap API for current weather details like temperature, conditions, humidity, and wind speed. User-friendly UI: Created a responsive interface with HTML, CSS, and JavaScript, featuring a city search box. Dynamic Updates: Used JavaScript to dynamically display weather info based on user input. API Integration: Efficiently integrated OpenWeatherMap API with robust error handling for invalid inputs and network issues.

Full-Stack E-Commerce Website

Tech Stack: React, Node.js, Express, MongoDB

- User authentication and role-based access control (JWT)
- Product listing, filtering, and search functionality
- Shopping cart and checkout system with payment integration (e.g., Stripe/PayPal)
- Admin dashboard for managing products, orders, and users
- RESTful API with Express.js for backend logic and MongoDB for data persistence

SKILLS:

- HTML
- CSS
- MYSQL
- JAVA
- PYTHON
- C PROGRAMMING
- JavaScript
- React Js
- MongoDB
- Node Js
- Express Js
- jQuery
- Django

CERTIFICATION:

- MERN STACK CERTIFICATION FROM ETHUNS CODEMITHRA
- PYTHON CERTIFICATION FROM GUVI
