Hobbies:

- Drawing/Painting
 - Photography
 - Writing
-

Skills:

- Knowledge of Global Regulatory guidelines such as FDA, EMA, ICH and WHO.
 - Knowledge of Drug Development
 - Teamwork
 - Time Management
-

Project:

- Title: Strategies for Nose-to-Brain Drug Delivery System

Investigated nose-to-brain drug delivery systems designed to bypass the blood brain barrier (BBB) by utilizing the nasal route for direct transport of drugs to the brain. The project focused on exploring how the nasal cavity serves as an effective pathway to deliver drugs to the central nervous system (CNS), minimizing metabolism in the gastrointestinal tract and liver.
