-

ACADEMIC PROJECTS

- **LAB Stock Maintenance System**

This projects helps to store all the stock details in one platform and reduce manual book entries due to no longer time maintain the details so we create a better GUI to access and Database to store all the stock details.

- **Art Gallery Management System**

This project helps to maintain all the details like Art,Artist,customer,exhibition center and number of visitors in one platform.So we create a better GUI to access and Database to store all the Art gallery details.

- **Voice controlled BOT**

This project will be based on IOT we create a 4-wheeler BOT and integrating with the raspberry pi and Arduino uno along with sensors. When you start to voice commands like start, stop commands the BOT will move forward and follow the black line.

- **Smart Unusual Event Detection**

This project will be based on deep learning mainly implemented for ATM security and safety purpose reduce the number of physical attacks and create a user friendly environment in ATM centers.

INTERESTS

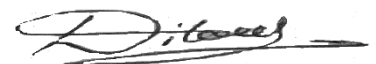

- Playing video games
- Learning Technologies
