- Schedule finished goods production weekly for each assigned product group considering all the manufacturing, Material constraints and supply risks, **Finalize and handover (Master production Schedule) Production Plan for 13weeks to the production Scheduler weekly.**
- Daily factory catch-up with Line scheduler to **discuss plan vs Actual (PTP)**, material issues or operational constraints if any and prepare mitigation plan to avoid Supply gaps.
- Co-ordinate Supply Planning activities like Scheduling overhaul, Capacity Planning with New Zealand Senior Supply Planner.
- Previous week review on Production performance, demand variance and mitigation plan.
- **Review Supply Gaps at SKU level for short term** with Senior Supply Planner.
- Checking safety stock is between System specified MIN -MAX levels by analyzing the demand forecast and **implementing Pull ins and Push outs of to mitigate supply risk on weekly basis.**
- In co-ordination with Material planner and Line Scheduler, Workout **weeks of coverage/Weeks of Supply for High runner/Critical** SKUs in case of limited material availability or Delay in Material ETA and check for alternate solutions like Air freight, considering loss of facing the cuts in supply is greater than that of Air freight.
- **Discuss with Demand Planner in case of frequent demand /Forecast changes or Upcoming promo events** to Proactively plan for the required SKUs.
- **Monitoring Daily and ensuring Skus produced in factory are transported on the same day to Distribution warehouse. If any constraints like Space constraints, availability of trucks,co-ordinate with concerned stakeholder and resolve to avoid Supply gaps.**
- **To monitor and maintain Case fill rate**, by performing root cause analysis of any issues and take appropriate action to improve Supply/replenishment.
- Ensure master data is correctly and timely updated in the system.
- **Review System Safety stock file for items flagged as OOS or below SS or high stock items.**
- Reviewing of SKUs which will have Excess Inventory in coming weeks and action plan to reduce the production/cooks to avoid slob.
- Inform concerned Stakeholders on Obsolete Inventory to avoid Case fill rate cuts in future.
- Work on Planning parameters of **New product Development (NPD)** and ensure smooth Supply during transition to regular SKUs.
- Co-ordinate with Trans-Tasman planners in case of vessel delays and inform order management team for DRP or Source change to avoid Stock out situation.
- Check planned orders and On hand inventory in JDA planning tool for individual SKUs to check if critical SKUs/High runners SKUs can be given priority instead of SKUs which have coverage.
- **Ability to work collaboratively with upstream (demand, innovation, and S&OP) and downstream functions (Material planning, scheduling, dispatch, customer service)**

- ◉ Handle Daily routine client meetings for CFR, Weekly Gap to Safety stock meeting, KPI and SLA meetings and managing Ad hoc mails from multiple stakeholders like demand planner, Quality team, Line scheduler, displaying effective verbal and written communication.
- ◉ Hands on experience of working on Production, Sales and Inventory excel reports Planning tool.

Forbes Marshall Pvt. Ltd., Maharashtra

Growth path:

- **Supply Planning**
- **Production Planning**

Pune

Key Result Areas:

- ◉ Adminstrating business practices to **create the highest level of efficiency possible** within an organization through **Operations Management**.
- ◉ Handling of activities of Production Planning & Control for Electronics & control instrumentation, Mechanical products like Smart Positioner, I/P transducer.
- ◉ **Production planning, Raw Material planning.**
- ◉ **Hands on experience on Assembly line.**
- ◉ Generation of shop orders and release to shop floor to match production schedule for Products like Smart Positioner And E-Positioners.
- ◉ **Planning daily, weekly production schedules** for the assembly Lines along with resource allocation and ensure on time material availability from Raw Material Store against Planned customer orders.
- ◉ Maintaining WIP (Work in Process) inventory, Rework & Scrap Handling.
- ◉ Area leader of SIP (small improvement project)
- ◉ **Single point contact** for Intern company Orders for Instrumentation -Mechanical products like Smart Positioner and E-positioner.
- ◉ Prepare weekly Production schedules and co-ordinate with Purchase team for availability date of material/Sub-assemblies which are below safety stock and confirm Supply plan to Intercompany division.
- ◉ Weekly review of BOM for discrepancy to avoid stock outs.
- ◉ **Monitor and Ensure Production plans are completed in specified time** and prepare mitigation plan to fill in gaps.
- ◉ Handled Monthly, Quarterly Supply Meeting in Co-ordination with Purchase team to **discuss Material shortages, operational challenges, and action plan to fill the gaps to minimize the demand and supply gap.**
- ◉ **Co-ordinate with Purchaser, third party (OSP) vendor ,in-house manufacturer to ensure production is on track and discuss hindering factors regarding material/manpower if any and develop mitigation plan for the same.**
- ◉ **Co-ordinate with FGS team for timely dispatch of Material.**
- ◉ **Maintain Buffer stock of FGs** for make to stock items as well as sub-assemblies for common Models and reserve the stock for Customer orders based on Due Date.
- ◉ **Maintain OTD 94-98%** ensuring no back orders and Minimize wrong and short supply complaints.
- ◉ **Good Understanding of ERP tools -Oracle R12 systems.**
- ◉ **Preparation and analysis of shortage reports to minimize demand and supply gap.**
- ◉ Experience of reducing supply chain loss without compromising on service levels. Handling of activities of Production Planning & Control Dept

HIGHLIGHTS:

- ◉ Received Recognition for Maintaining On Time Delivery of customer orders thereby achieving goals and targets withing specified time.
- ◉ Implemented Continuous improvement Projects (Kaizen) like fixtures, jigs to reduce efforts, cycle time and increase productivity.
- ◉ Implemented 5'S, FIFO in plant & carried out other Continuous Improvement (Kaizen)System in plant.
