A vigilant, meticulous, and erudite individual with over 6 years of pioneering experience in the Pharmaceutical industry. Offering profound knowledge and experience in Quality Control, Research and Development (R&D), Good Manufacturing Practice (GMP), and ICH Regulations. Seeking to prove and utilize my skills effectively and efficiently to provide impetus to my career in the process of achieving organizational goals in the Pharmaceutical Industry.

KNOWLEDGE PURVIEW

A technically astute QC Analyst with impeccable knowledge and understanding of the technical principles, theories, concepts, and best practices of the analytical techniques used in the physical and chemical analysis of drug substances and raw materials.

Demonstrated knowledge of analytical equipment and instrumentation utilized for the testing of APIs, associated drug product, and raw materials.

Comprehensive understanding of Good Laboratory Practices (GLP), Good Documentation Practices (GDP), Good Manufacturing Practices (GMP), and other regulatory requirements.

Strong working knowledge of analytical techniques, such as wet chemistry and chromatography as well as analytical instrumentation operation, troubleshooting, and maintenance.

Advanced knowledge of QC testing requirements, methodology, equipment, and basic chemistry.

Analytical and critical thinker with exceptional negotiation, communication, problem solving, time and resource management, and organizational skills.

WORK EXPERIENCE

Raw Material Sampling & QC RM analyst

MYLAN PHARMACEUTICAL Pvt. Ltd.

10/2015 - Present

Nasik, MH

Key Job Responsibilities

- Provide direct Quality Control support for all activities (including on-the-floor quality oversight, raw materials release, nonconformances, change control, and CAPAs) at Mylan Pharmaceutical.
- Work on LIMS software (Data storage, Master Data Preparation, and Analysis) and lab instrumentation.
- Participate in department initiatives to support the continuous improvement of the quality systems of the QC Raw Materials department
- Utilize analytical techniques and instrumentation, such as HPLC, Spectroscopy (FTIR & UV), and maintenance and troubleshooting.
- Perform standard qualitative and quantitative analysis on purchased raw materials, in-process products, pure drug substances, and finished pharmaceutical preparations in accordance with approved sampling, inspection & testing procedures.
- Facilitate routine laboratory tests as required on raw materials to check characteristics against specifications in order to assure quality. Perform physical and chemical analysis of ad-hoc samples of raw materials.
- Perform maintenance and calibration of complex laboratory equipment according to the established calibration program. Maintain calibration tracking records of all instruments.
- Perform analysis and assist in investigation of sample and troubleshooting of quality issues and laboratory and results recorded in full compliance with cGMP.
- Prepare reagents, diluents as per STP's. Perform the sampling of API & Excipients materials as per SOP by following cGMP/GLP, safety procedures.
- Maintain compliance to all health and safety standards, SOP's, cGMP, GLP, BP, USP regulatory requirements. Utilize technical and regulatory knowledge and judgment to validate procedures to comply with internal SOPs and regulatory needs with minimal supervision. Ensure a safe working environment for the lab and ensure regulatory compliance.

Tutor

NAVODAY VIDYALAYA

01/2015 - 09/2015

Key Job Responsibilities

- Worked as Tutor and delivered lectures for subjects including English and Mathematics.
- Facilitated, monitored, and assessed student learning by evaluating student performance and provided recommendation for improvement.
- Worked as part of an interdisciplinary team to collaborate regularly and implement curricula and activities to meet academic standards.
