INDUSTRY PROJECT

Project #1

Title: Drivo Travels Ltd
Duration: Jan to Mar 2018
Programming Languages: JAVA
Software: Android Studios
Database: Firebase
Descriptions:

Project based on online car booking system which was inspired by all the leading car booking online industries (like zoom cars, Revv). In this project I have tried to make it as a full functional business requirement application, in which end user can easily look at any vehicle and book as per their requirements budget and time schedules.

Responsibilities:

- ✚ Understanding the project requirements and analyzing the backend requirements.
- ✚ Developing the required logic based on the backend Requirement.
- ✚ Developing/Enhancing the code based on the future Requirement.
- ✚ Involved in accessing data from database as demanded from a task.

Project #2

Title: Payroll Management
Duration: Dec 2018 to till Date
Client: Methodical Digital solutions
Programming Languages: Python
Framework: Django, Django RestFramework
Database: MySQL
IDE's: Pycharm

Descriptions:

Payroll management facilitates fastest payroll services to the registered clients when compared to manual payroll. Apart from payroll it provides leave tracker, tax calculator, form 16 and Api access to clients. Fixed reports are generated and send to the client mails. Customized reports also provided according to client requirements.

Responsibilities:

- ✚ Understanding the project requirements and analyzing the backlog requirements.
- ✚ Developing the required logic based on the Backlog Requirement.
- ✚ Involved in developing/Enhancing the code based on the client requirements.
- ✚ Involved in accessing data from database as demanded from a task
- ✚ Involved in creating modules and models using python required for the project.
- ✚ Involved in rest api's implementation.
- ✚ Coordinating with team in implementation of business logic such sms functionality, reports generation and email functionalities.
