DIPLOMA FINAL YEAR , ACADEMIC PROJECT DETAILS

ABHAYA- One Touch For Safety. An Android Application.

My final year project ABHAYA is an Android based application and It is a integration of 4 modules i.e nearest places ,motion messaging, find my way back and the medical help.
the objective of this project is to provide an emergency services such as

- **Nearest Places: it consist of** Hospitals, Police Station, pharmacy ,Fire station's list and address and with location from present location to destination through google map..
- **Motion Messaging Module:**in this module by shacking the user smart phones the women or anyone can send their locationas a message through the accelerometer sensor ,the user wants to register 3 trusted persons contact number to get the help when the women/ user is in danger situation .
- **Find My Way Back** –it is the module which presets the location when the user don't know the exact address of the present location ,just user wants to save(pin) the location when the user wants to revisit again just user wants to find my way button that redirects to the saved location with the help of google map.
- **Medical help** –this consist of 2 sub module i.e first aid-it gives the first aid treatment for some casual injuries with the demo(images)
- **Tips**-it provides the treatment for some common diseases to read more the read more button is their by tapping that button it redirects to the specific website that gives full treatment description for the diseases.

	This application completely provides the public emergency services and also women safety with in single application.
