PERSONAL PROJECTS

Build a circuit using Logisim simulator (04/2019 - 04/2019)

- Building and testing a circuit for an elevator using Logisim Simulator software.
- Preparing a report explaining my work and then going through a final interview explaining my design.
- This project helped me boost up my technical as well as creative and thinking skills. Thinking out of the box is another thing that I developed in me while working on this project.

System Analysis and Design (06/2019 - 09/2019)

- Designing a new online system for Delhi Public School to keep the students and their parents updated about the school curriculum and results via their online portals.
- The project was divided into three parts including Project Management, System Analysis and System Design. Visio was used to for the designing tasks.

Database Design and Management (06/2019 - 09/2019)

- Design a database to help the proprietors of BigM to help them manage their business.
- Analyse, design, and develop an appropriate conceptual data model and relational database schema, based on the information provided by them. MySQL was used for the database management.

Database Security (06/2019 - 07/2019)

- Designing and developing a database for Remarkable University, which was implementing a new online system. Then working on its security by creating users and granting privileges.
- MySQL was used in this project.
