PROJECT WORK

Society ManagementApp

Description: This is a Residential Society Management Application. Using this application the society management staff can create new Members and track their Maintenance records .The maintenance object keeps a track of the members who have paid the maintenance amount and which members have their maintenance amount due. Staff can also send mail to the Members reminding them to pay the society maintenance fee .On receiving the amount an acknowledgement message is sent to the member. Security guards can use the visitor object to enter data of all the Visitors that pay a visit to the members of the Society in a day and maintain all the details such as relationship with the member, contact details, and reason for the visit.

- **Role & Responsibility:**
- Role :Developer
- Responsibility:
 1. Design and Development of Schema
 2. Creating Data Model Object and Fields
 3. Creating Business Process Automation
 4. Developing Visual force pages ,Apex Controller And Apex Trigger
